WHO'S WHO?

1k+ Enterprise Tech Leaders

At its core, Seattle Startup Summit is a deal making/originating conference. We want you to come and find ways to get into enterprises. We've arranged this through working with hundreds of tech leaders from Fortune 500 companies this year.

120 Early Stage Startups

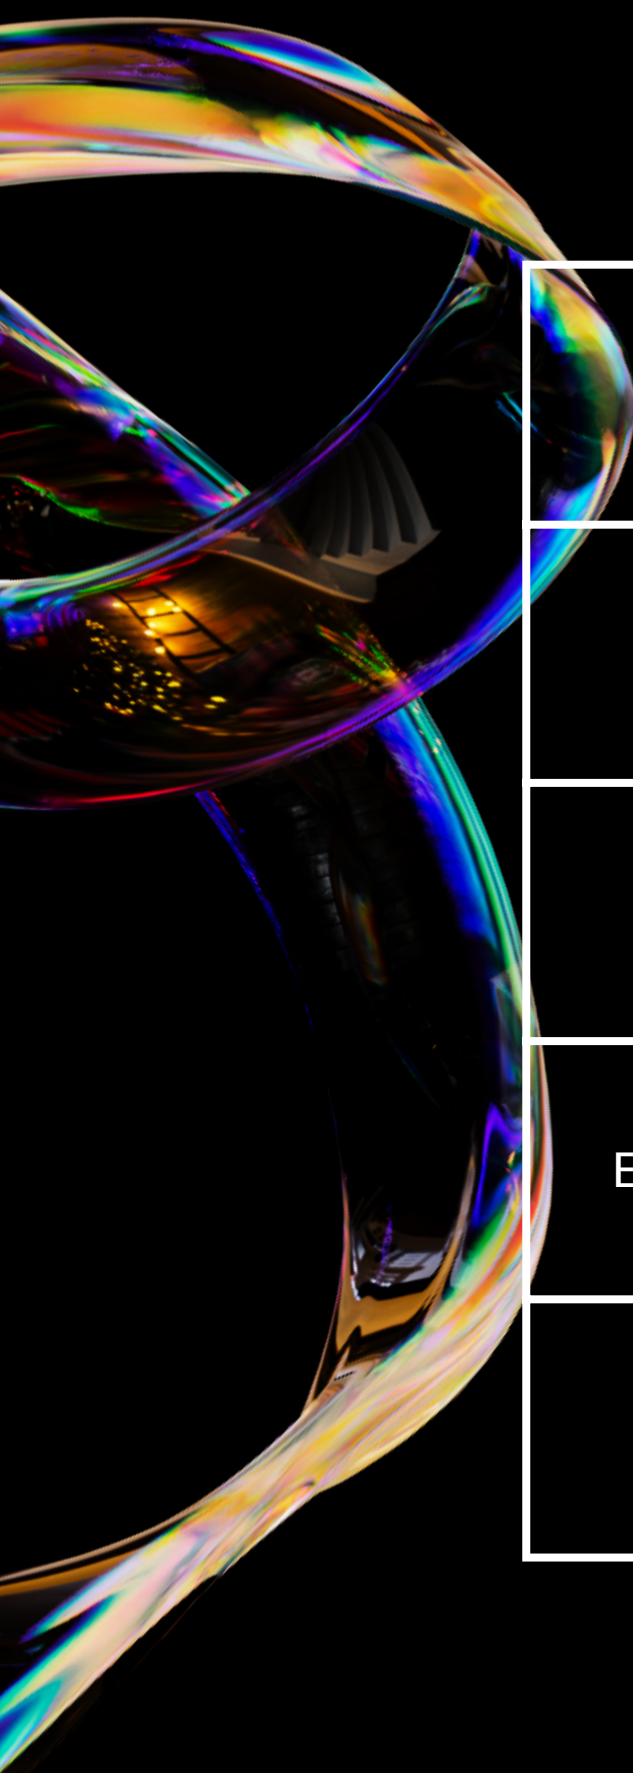

We work with over 100 enterprise tech leaders, VCs, and exited founders to screen startups for eligibility to demo. Over 300 startups have applied to join us this year and we expect that number to go up. But only the best 120 make it through.

Top Tier Companies

Seattle Startup Summit is sponsored by companies like Databricks, Microsoft, Snowflake, JPMorgan, Redis, Okta, AWS, and many of the biggest names in not just technology, but business as a whole.
